# **METAL SHARK® GF**

#### **For Gravity Feed Pipelines**

Typically, GF metal detectors are used in gravity feed pipes and provide highest performance in detecting magnetic and non-magnetic metals. The bulk material falls through the metal detector. With the reject flap EX-S even smallest metal objects are separated out of the product stream promptly.

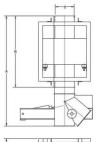

Maintenance free design and high quality construction, for reliable operation in the most challenging industrial environments.

## **METAL SHARK® GF compact**

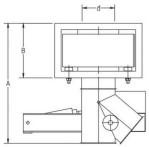

#### For GF Pipelines in Height Limited Installation Locations.

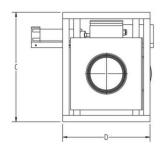

Typically, GF compact metal detectors are used in gravity feed pipes and provide high performance in detecting magnetic and non-magnetic metals. The bulk material falls through the metal detector. With the reject flap EX-S even smallest metal objects are separated out of the product stream promptly.

The GF compact types have a low assembly height and are especially designed for height limited installation locations. Due to the ultracompact sensor head, the metal detection performance is slightly lower compared to the GF types.

Maintenance free design and high quality construction, for reliable operation in the most challenging industrial environments.

Cassel Messtechnik GmbH (Germany) - Headquarters and main production site

With its production facilities located near Hannover, Germany, Cassel manufactures approximately 1,000 inspection systems annually. Nearly 80 percent of Cassel equipment is exported to the European Union, United States, Southeast Asia, Australia, South Africa and South America. Cassel supplies equipment to several industries, including food production, plastics, pharmaceuticals, textiles, forestry and mining. Cassel machinery can be found in the production lines of many global and respected brands.

Cord Cassel Managing Director of Cassel Messtechnik GmbH

Customers receive valuable service and support wherever their product inspection systems are located around the world. Over 50 representative offices around the globe provide service performed by factory-trained technicians.

Since 1994, Cassel Messtechnik GmbH (Cassel) has led the production machinery industry in the design and construction of metal detection, checkweigher and x-ray inspection systems for industrial applications. Cassel systems specializes in protecting valuable production machinery against damage caused by undiscovered metal parts. Cassel also succeeds in quality control in the consumer goods industry. Cassel strives to supply quality and high performance at a reasonable price.
